DETAILED ACTION

1. Claims 1-40 are currently pending in the instant application and are subject to the following election of species requirement.

Election of Species

2. An election of species of a particular compound is required. In order for this election to be considered fully responsive to this requirement the election **must include**:

- a) the name and structure of one species of the instantly claimed product of formula I
- b) the location of the species (a) within the claims or (b) within the specification,
- c) the claims that read on the elected species,
- d) a definition of the exact substitutions,

e.g. R₁ is Hydrogen, X is oxygen, etc...

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

There is a search and/or examination burden for the patentably distinct species as set forth above because at least the following reason(s) apply. Regarding the compounds, the species would likely require different fields of search (for example, the divergence of variables would lead to multiple search queries), and the compounds would be differently classified depending on which specific rings are present in the compound, such that the search of different classes/subclasses would be necessary to conduct a full search.

Applicant is advised that the reply to this requirement to be complete must include

(i) an election of a species to be examined even though the requirement may be traversed (37

CFR 1.143) and (ii) **identification of the claims encompassing the elected species**, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

The election of the species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the election of species requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected species.

Should applicant traverse on the ground that the species, or groupings of patentably indistinct species from which election is required, are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing them to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the species unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other species.
